Left DC Motor  
Right DC Motor

- This carrier robot is simple model for exercising the DC motor programming.
- You have to install the EQ-ROBO software to your computer and making program to download and running the robot (without program, no working).
- Download site : <https://sites.google.com/site/eqrobo/eq-download>
- About the EQ-ROBO program algorithm, please refer to another manual.

UP : User Programming mode

# Part List of a Carrier robot
